

Shellac Overlay Aftercare

CND Shellac – 14 day wear, mirror finish, no dry time, no nail damage.

I know you will absolutely LOVE your nails while you are wearing Shellac and we expect your nails to last flawlessly for at least 14 days as long as you give them a little care and attention during that time.

We say Shellac is pretty indestructible with Normal Wear and Tear, which means you have to partner with us by adding a little protection to your nails if doing tough jobs like household cleaning and gardening, hobbies that are rough on your hands or using harsh chemical products without wearing gloves; doing these things without protection can damage the shellac.

If you do happen to cause some damage to the Shellac coating and see any of the following signs, we hope you find the advice below helpful.

If lifting or peeling is noticed please do NOT pick or pull at the lifted area, as this will cause the lifting to increase and could even damage the natural nail. Please ring us on 07747 467 515 / 07919 885 322 so that we can assess the nail and decide if a repair is necessary. Please note that repairs will be chargeable.

If you are on holiday please be careful when using sun tan oils or insect repellent solutions as many of these products contain DEET which will cause major damage to the Shellac colour coat.

Please use Cuticle Oil as often as possible.

Relative to your life-style and activity level, your Shellac will need maintenance after 14days as there will be obvious re-growth. At this point we can either re-Shellac your nails (remove existing Shellac and apply a fresh new colour) or remove the Shellac completely which takes a brief 10 minutes.

If you do decide you want to remove your Shellac please call us and let us do it safely for you. Incorrect removal at home may damage the surface of your nails. We will be able to remove Shellac using a professional remover and give you an express manicure so that your natural nails look perfect.

To discuss please call 07747 467 515 / 07919 885 322
